

A.J. DAVIDOFF LLC

Geologic and Geophysical Consulting Services for
The Legal, Renewable, and Oil and Gas Industries

ANDREW J. DAVIDOFF, Ph.D., PG

PROFESSIONAL EXPERIENCE

2024 to
Present

A.J. Davidoff LLC
Managing Partner

Dr. Davidoff specializes in conducting technical investigations and analyses, synthesizing complex data into comprehensive reports, and offering expert testimony crucial for resolving disputes and legal matters within the realms of geology and geophysics. His expertise encompasses diverse areas such as deep-water exploration, with recent hands-on experience in the Gulf of Mexico, as well as the generation of potential drilling locations, both offshore and onshore, spanning from arid deserts to lush tropical regions. Furthermore, he brings valuable proficiency in field development planning, integrating geological, geophysical, and reservoir engineering data to devise and execute effective Field Development Plans (FDPs). Proficient in both 2D and 3D seismic interpretation techniques, He possesses broad-ranging experience across various geological and geophysical domains, including surface and subsurface features, seismic activities, river processes, and geothermal resources, among others.

- General Geology
- Oil and Gas Exploration
- Field Development
- Implied Covenants
- Duty to Develop
- Subsurface Trespass
- Injection Wells
- Development Wells
- Reserves and Reserve Audits
- Unitization
- IRS disputes and SEC violations
- Aquifer Contamination
- Seismology
- Seismic Surveys
- Seismic Interpretation
- Earthquakes
- Earthquakes due to Injection
- Geothermal Resources
- Slope Failures/Landslides
- Riparian/Fluvial Geology
- Erosion
- Global Warming/Climate Change

2025 to
Present

ACS Engineering & Safety
Associate

Through my role at ACS Engineering & Safety, I assist in resolving disputes where geologic and geophysical evidence plays a central role. From seismicity linked to injection wells to erosion, slope stability, or field development, I combine subsurface knowledge with advanced interpretation techniques to deliver fact-based insights. My focus is on technical accuracy, effective communication, and supporting clients in high-consequence legal and regulatory matters.

2024 to Present DJS Associates
Associate

As an Associate with DJS Associates, I provide expert witness services in geology and geophysics, contributing to technically rigorous investigations and clear, defensible opinions. My work often involves seismic interpretation, subsurface trespass, aquifer contamination, and landslide analysis: areas where scientific clarity can make or break a legal argument. Whether the issue lies in the rock record or the reservoir, I help legal teams untangle complex subsurface data and present it in terms a jury can understand.

2020 to 2024 Exigent Group Limited
Associate

During his tenure, Dr. Davidoff provided technical investigations, analyses, and reports to resolve disputes in geology and geophysics. Notable expertise includes deep-water exploration in the Gulf of Mexico, offshore and onshore prospect generation, and field development planning. Dr. Davidoff specializes in integrating geologic, geophysical, and reservoir engineering data for effective plans. Proficient in 2D and 3D seismic interpretation, he possesses a broad knowledge of surface and subsurface geology, river processes, landslides, wastewater-induced seismicity, and geothermal resources.

2022 to 2023 Geothermal Core, Inc.
Founder/CTO

Dr. Davidoff founded Geothermal Core Inc. in collaboration with Geothermal Development Corporation and Edge196. As Chief Technology Officer, Dr. Davidoff developed strategic vision and technical strategies for implementing affordable industrial and community-scale electricity projects in Texas and the Gulf Coast.

2021 to 2023 Geothermal Development Corporation
Founder/CTO

At Geothermal Development Corporation, Dr. Davidoff laid the technological foundation and formulated industrial and community-scale electricity generation strategies from low-enthalpy geothermal resources in Texas and the Gulf Coast.

2017 to 2020 Schlumberger SIS
Consultant/Geophysicist

At Schlumberger SIS, Dr. Davidoff served as a Consultant/Geophysicist, providing expertise to exploration and depth imaging teams. He verified the Full Waveform Inversion (FWI) velocity models by aligning them with tectono-stratigraphic frameworks and well velocity data. Additionally, he interpreted extensive 3D seismic data covering over 25,000 square kilometers for exploration, velocity model building, and depth migration. He also conducted documentation, workshops, and presentations for Schlumberger and client teams, mentoring and training junior geoscientists in geology and geophysical interpretation. Notable projects included exploration efforts in Kuwait Bay and shallow-water and deep-water imaging projects in the Northern and Southern Gulf of Mexico and the Nile Delta.

2014 to 2016 PetroCeltic/Sonatrach/Isarene Groupement, Ain Tsila Field, Illizi Basin, Algiers,
Consultant/Lead Geophysicist

Dr. Davidoff served as a Consultant/Lead Geophysicist for PetroCeltic in Algeria. In this role, he provided specialized expertise and leadership for developing the Ain Tsila Field, a significant gas reservoir in the Southern Illizi Basin. As part of a joint venture between PetroCeltic, Enel, and Sonatrach, He was responsible for overseeing all geophysical aspects of the project. This included managing a 24-well drilling program to meet the initial gas production requirements.

2013 to 2014 Pertamina Indonesia
Consultant/Advisor

At Pertamina, Dr. Davidoff served as Geophysical Advisor to the Director for Upstream Operations in Indonesia. In this role, he played a pivotal part in the peer review team. His responsibilities involved conducting comprehensive assessments of Pertamina's core fields, which accounted for 80% of their production. He provided valuable recommendations to enhance production levels and success rates, particularly focusing on development strategies and near-field exploration initiatives.

2012 to 2013 PTTEP Thailand

Senior Geophysical Advisor

At PTTEP Thailand, Dr. Davidoff was the Senior Geophysical Advisor, reporting to the Vice President of Geophysics. He played a crucial role in mentoring and training a team of 35 junior and senior geophysicists. His responsibilities included overseeing interpretation projects such as the GSB New Zealand and Block 65 Oman, which involved analyzing vast amounts of 3D and 2D seismic data. Additionally, he advocated for adopting and developing training programs for advanced geophysical techniques, including seismic stratigraphy and seismic geomorphology, attribute analysis, and basic seismic interpretation.

2010 to 2012 Vegas Oil and Gas, Egypt

Geophysics Manager: Petroamir and Petrosafwa JVs

As the Geophysics Manager at Vegas Oil and Gas in Egypt, Dr. Davidoff oversaw all Petroamir and Petrosafwa Joint Ventures (JVs) geophysical activity. In this role, he led a team of 5 geophysicists, ensuring their work met the highest standards of technical excellence. Additionally, he mentored three junior geophysicists and assumed the role of Exploration Manager when needed. His responsibilities included interpreting and integrating geological and geophysical data to facilitate play mapping, source rock distribution, and reservoir characterization. This analysis was crucial for evaluating play/prospect uncertainty, risk, and volume estimations.

2009 to 2010 Vegas Oil and Gas, Egypt

Assistant Exploration Manager and Gas Team Lead: Alam El Shawish JV

As Assistant Exploration Manager and Gas Team Lead for the Alam El Shawish Joint Venture, Dr. Davidoff led a diverse team of geophysicists, geologists, reservoir engineers, and others, guiding them in delineating and developing gas assets. He oversaw various activities, including field development planning, drilling

operations, and reserves assessments, ensuring a high level of technical proficiency and seamless integration across disciplines.

2007 to 2008 RWE DEA, Egypt

Consulting Geophysicist, Exploration Department

Dr. Davidoff conducted extensive geological studies covering the West Nile Delta area from onshore to deep water, including regional interpretation and sequence stratigraphy. He generated play and prospect assessments using 3D seismic data spanning 4,500 square kilometers. His responsibilities extended to creating regional play maps for evaluating prospects, constructing Petrel models to estimate reserves, and conducting rock property studies. Additionally, He interpreted AVO (amplitude versus offset) attributes to further enhance the RWE understanding of subsurface structures and properties.

2003 to 2007 Murphy Oil Company, Malaysia

Senior Dev. Geophysicist, Kikeh Field (700 MMBO), Block K, Deep Water, Sabah

Dr. Davidoff's primary focus was on the Kikeh Field in Block K, located in deep waters off the coast of Sabah. He was responsible for the interpretation and depth conversion of 3D seismic data to assess the subsurface structure and characteristics of the Kikeh and Kikeh Kecil Fields. He collaborated closely with an integrated team to delineate the fields, develop comprehensive field models, and plan field development strategies. Additionally, he contributed to SEC reserve audits and presented findings to the Petronas and Murphy boards for approval.

2003

University Brunei Darussalam

Visiting Senior Lecturer, Department of Petroleum Geoscience

During his tenure, Dr. Davidoff provided guidance and supervision to Master of Science students working on their theses. His role involved offering expertise and support to students as they conducted research and developed their academic projects within the field of petroleum geoscience.

2001 to 2002 Kodeco Energy Company, Ltd., Indonesia

Geophysical Consultant

At Kodeco Energy Company, Dr. Davidoff provided consulting and project management services for the Velocity Modeling and Pre-Stack Depth Migration (PSDM) of the West Madura 3D Seismic Survey. His responsibilities included overseeing the process of velocity modeling and pre-stack depth migration, which at that time was considered an advanced technique used to enhance the quality and accuracy of seismic data interpretation.

1999 to 2001 GX Technology Indonesia

Jakarta Center Manager and President of GX Technology Indonesia

As the Jakarta Center Manager and President at GX Technology Indonesia, Dr. Davidoff led a geophysical services company specializing in Pre-Stack Depth Migration (PSDM). He played a pivotal role in the operation's growth, transforming it from a one-person home-based office into a team of 12 professionals. His responsibilities encompassed all operational aspects, including sales, profitability, and maintaining high standards of technical excellence throughout the organization.

1997 to 1999 Landmark Graphics Corporation, Indonesia

Consultant to the Professional Services Organization: Asia Pacific Region

As a Consultant to the Professional Services Organization for the Asia Pacific Region, Dr. Davidoff provided consulting services specializing in various aspects of seismic interpretation and 3D seismic visualization. His responsibilities also included attribute extraction, velocity modeling, and time-to-depth conversion to enhance the understanding of subsurface structures. Additionally, he integrated geological and geophysical data for comprehensive mapping, conducted well-log analyses, estimated reserves, and managed databases to support exploration and production activities for both national and international oil and gas companies.

1996 to 1997 GX Technology

Team Leader and Senior Depth Imaging Geophysicist

At GX Technology, Dr. Davidoff provided technical expertise, training, and mentorship in various aspects of structural and stratigraphic interpretation, including both 2D and 3D seismic data analysis. His responsibilities encompassed building velocity models to convert seismic data from time to depth and conducting pre-stack depth migrations to improve subsurface imaging. Additionally, he specialized in depth-based velocity analysis and performed forward and inverse seismic modeling to enhance the accuracy of subsurface imaging and interpretation.

1993 to 1996 Landmark Graphics Corporation/Geographix, Denver and Houston Offices

Consultant

Dr. Davidoff provided various technical services to support geologic and geophysical exploration efforts. His responsibilities included mapping geologic, geophysical, and cartographic data to visualize subsurface structures and features. Additionally, he integrated geological and geophysical data sets to enhance the understanding of subsurface formations. He conducted detailed analyses of well logs to evaluate reservoir properties and estimate reserves. Furthermore, He managed databases to ensure efficient storage and retrieval of exploration data, facilitating decision-making processes.

1990 to 1993 Texas A&M University

Graduate Research Assistant, Department of Geology, Center for Petroleum Reservoir Geology

- Major studies included:
 - Structure, stratigraphy, and hydrocarbon potential of the Brazos basin
 - Sequence stratigraphy of the Paleogene section, central East Texas
 - Primary migration and trapping of hydrocarbons in the Late Cretaceous Austin Chalk

EDUCATION

Ph.D., Geology, Texas A & M University, College Station, TX, 1993

M.S., Geology, University of Houston, Houston, TX, 1989

B.S., Geology, Western Washington University, Bellingham, WA, 1982

PROFESSIONAL LICENSING

State of Texas: Professional Geologist, License Number 15220, 2021

PROFESSIONAL ASSOCIATIONS

American Association of Petroleum Geologists (AAPG) Member since 1988

Society of Exploration Geophysicists (SEG) Member since 2007

Houston Geophysical Society (GSH) Member since 2015

Institute for Energy Law, Advisory Board Member since 2020

Geothermal Rising, Member since 2022

PROFESSIONAL AWARDS

AAPG A.I. Levorsen Memorial Award for Best Paper (1991)

Gulf Coast Association of Geologic Societies Award for Best Paper (1991)
