

Andrew McKewen, CSHO

281-910-5941

andrew@servicesafety.net

10501 Eagle Fork Ct.

La Porte, TX 77571

Mr. McKewen has over 14 years of occupational safety and health experience within the construction industry. Over the past 12 years he has been in a senior management position within several construction builders and safety consulting companies.

The following detail the and services provided to clients and employers;

Accident Investigation

Thorough, detailed and efficient investigations of accidents, ranging from property damage to construction fatalities. Breaking down everything from company policy to human behavior to find the root cause of the accident.

OSHA citation disputes

Research the standards which were cited as being in violation, find OSHA Letters of Interpretation, take into account job-site conditions, company policy, training and human behaviors; then meet with OSHA in an informal conference to eliminate the citation.

Job-site audits

Inspect job-sites, observe employees' activities. Inspect tool and equipment for safe and proper use and condition, engage with employees in discussions about their personal safety and health, correct issues found during the inspection, produce a report detailing my findings.

Corporate safety manual implementation

Write the safety manual for a corporation that encompasses the safety and health concerns of the company.

Policy/procedure implementation

Analyze an area of concern, observe the current method for this task, research best practices and what leaders and colleagues in the industry are doing, then, with this information, write and implement the new policy/procedure.

Safety Training

Conduct trainings in all aspects of safety, including Competent Person training, OSHA Outreach 10 and 30 hour- Construction, First Aid, CPR, AED, heavy equipment operator training.

Documentation Review

Review documentation from clients. From review of their safety manual, to OSHA citation paperwork, to depositions for my opinion.

Mr. McKewen's knowledge and experience have been essential to the development and success of many safety programs, employee training and education, accident resolution and OSHA dealings. The following details Mr. McKewen's experience and education;
