Video: <http://www.ElectricalExpert.Solutions/Video>

Depositions:

- A. My first deposition was in a civil case that I was being sued personally. I had loaned an Electrical Contracting Company a significant amount of money secured by the three owner's personal California residences. The company defaulted on the note, and I pursued foreclosure of the 3 homes as my remedy. All separate parties sued the Certified Public Accountant (CPA) who had put us together and I was named in an additional suit by the other plaintiffs. All cases were consolidated, and the case was heard in San Francisco Superior Court. I was deposed for approximately 6 hours and was on the stand for approximately 2 hours. I was fully exonerated and received a substantial award from the CPA's Errors and Omissions insurance company.
- B. My second deposition was for a case in which an Electrician was badly shocked by a 12,000 volt utility line, I was deposed in person & on video for 5 hours, case #13.
- C. My Third deposition was for a Commercial Warehouse Building Fire, 15,000 SF 100% loss, Electrician Standard of Care, Zoom Deposition 6 hours, case #29.
- D. My fourth deposition was for a drying furnace that exploded, I was retained to examine the electronic controls, temperature sensors and absence of door locks. Zoom deposition 2 hours, case #41.

Mediations:

I have testified in 5 mediations as an Expert Witness 3 for Plaintiff (Cases #2, #9 & #23) and 2 for Defendant (Cases #1 & #5).

Reports:

- AA. Electrical Equipment report for a Cannabis growing case in Napa Superior court. Case #1.
- BB. Electrical Equipment failure report. Sewage flooding of a \$5 million-dollar home in Lake Tahoe, Nevada. Major sewage lift station failure, a standby generator failed to start due to lack of fuel caused by a failed electrical circuit. Case settled out of court. Case #2.
- CC. Report of my finding in an electrical shock case in Oxnard, CA. Plaintiff sued major hardware retailer after he was shocked when touching a fluorescent light fixture's lamp holder while the fixture was energized. Case settled out of court. Case #3.
- DD. Electrical Cost Estimating Report, 2000 amp, 2,400 volt, three phase service, change order analysis for pad mounted replacement transformers. Case settled out of court. Case #26.
